Professional experience

Backend Developer .NET   **March 2024 - now**

ReImagine S.A.S.   Remote
- I develop and maintain APIs using .NET (versions 6, 7, and 8) and Entity Framework, using event-driven architecture.
- I manage and optimize PostgreSQL and MongoDB databases.
- I integrate and manage asynchronous messaging using RabbitMQ as a way of communication between services.
- I develop AWS Lambdas and integrate other AWS services such as S3.
- I actively participate in the review, analysis, and estimation of technical and functional requirements.

DevOps Developer   **October 2023 – January 2024**

Internship en Labtory S.A.   Rosario, Santa Fe, Argentina
- I developed and adapted Docker containers to optimize development and deployment environments.
- I performed migrations and backups of MongoDB databases.
- I modified configurations in Kubernetes environments.
- I executed tasks in AWS environments, collaborating on the deployment and management of cloud resources.

FullStack Developer

Personal projects that I develop to expand and improve my Frontend and Backend skills.

All of them are available in my portfolio.
